sensitive rotating disc. The amplified signal is recorded on this disc at a speed of 3600 rpm for high resolution and clarity. The signal is picked up from the disc and passed on to a reading amplifier at the moment the button is pressed. The signal is re-amplified by means of a video amplifier which feeds the “Memory Vision” picture tube. The entire process takes about one sixtieth of a second from the moment the button is pushed until the frozen image appears on the “Memory Vision” screen.

KITCHEN SHOWS

New York—(VWL)—During the month of June The Kitchen for electronic media is presenting a video festival dealing specifically with video as an electronic art medium.

Video artists from throughout the United States and Canada have been invited and scheduled to present their works which will include synthesized color and black and white visual compositions, simultaneous multi-channel video environment and many other rarely seen forms of electronic art.

Among the artists presenting their work are: Nam June Paik, Eric Siegal, Steven Beck, (each of whom work their own specially designed video synthesizer); Aldo Tambellini, Douglas Davis, Stan VanDerBeek, artists from Video Free America—San Francisco; Global Village, Space Video Arts, and many more.

Organizing (and participating in) the festival are Woody and Steina Vasulka, Shridhar Bapat, and Bill Etra.

For information about specific daily programs call The Kitchen at 212-475-9865, or write The Kitchen, Mercer Arts Center, 214 Mercer Street (between Bleecker and Third Streets), New York, New York, 10012.

MUSEUM TAPES
