Dear Sir;

We are a group of video artists. We would like to come to your school to show some of our tapes, conduct classes in technical as well as aesthetic aspects of our tapes. We would like to conduct workshops, seminars, marathon tape showings, and multi-media events. Our speciality is abstract video, investigating the properties of frequencies, both light and sound. Of our abstract tapes, if not the entire image, the modulations of the images are electronically produced. Of course we make other kinds of tapes as well. Another possibility is that we would send you a copy of some of our work, even willing to sell the rights for some tapes..... Let us know if you are interested..... We conduct thrice weekly tape showings, and also conduct an amateur night as well, so that you can easily have an opportunity to preview some of our works. I hope to hear from you soon.

Yours truly,

Dimitri Sevlatkin
