COMPUTER ARTIFACTS

An extensive exhibition of computer-aided art fills the galleries of the Long Beach Museum of Art until March 13. Such video luminaries as the Vasulkas, Bernd Kracke, Dan Sandin, Jane Veeder, Tom Defanti, Stephen Beck, the Etras, Zsuzsa Molnar, Frank Dietrich and Linda Cossey are liberally represented in this massive show.

A special panel discussion, entitled *The Philosophy and Origins of Computer Art,* features the thoughtful comments of Gene Youngblood, professor at Cal Arts; Steina and Woody Vasulka, artists; and John Whitney, Sr., filmmaker and professor of Television and Motion Pictures at UCLA. This panel will be held on February 23 at the University of Southern California campus. For more information, contact: Long Beach Museum, 2300 East Ocean Blvd., Long Beach, CA 90803 (213) 439-2119.   ●
