

THE FUTURE OF DESIRE:

The art and technology
of video in the 80's

A presentation by

Gene Youngblood

"... the industrial civilization exists today in a state of evolutionary crisis which threatens our very survival ... analysis of the mass media's role in human evolution can reveal what we must do to prevent the crisis from becoming a catastrophe ... the crisis is caused by the mass media, and only by totally reconstructing the mass media ... can we prevent the crisis from becoming a catastrophe."

—*Youngblood*

"Youngblood's book (*Expanded Cinema*) represents the most important metaphysical scenario for coping with all of the ills of educational systems based only on yesterday's Newtonian-type thinking."

—*Buckminster Fuller*

An ongoing series to introduce and explore the inception of an educational television station in Santa Fe. Anyone interested in this project should attend.
